

# Updated Manual Labelling SOPs - Flanges

All the equipment related to the valve assembly should be labelled as a line, rather than part of it being considered as a **flange**.

## 1- Solenoid Valves:

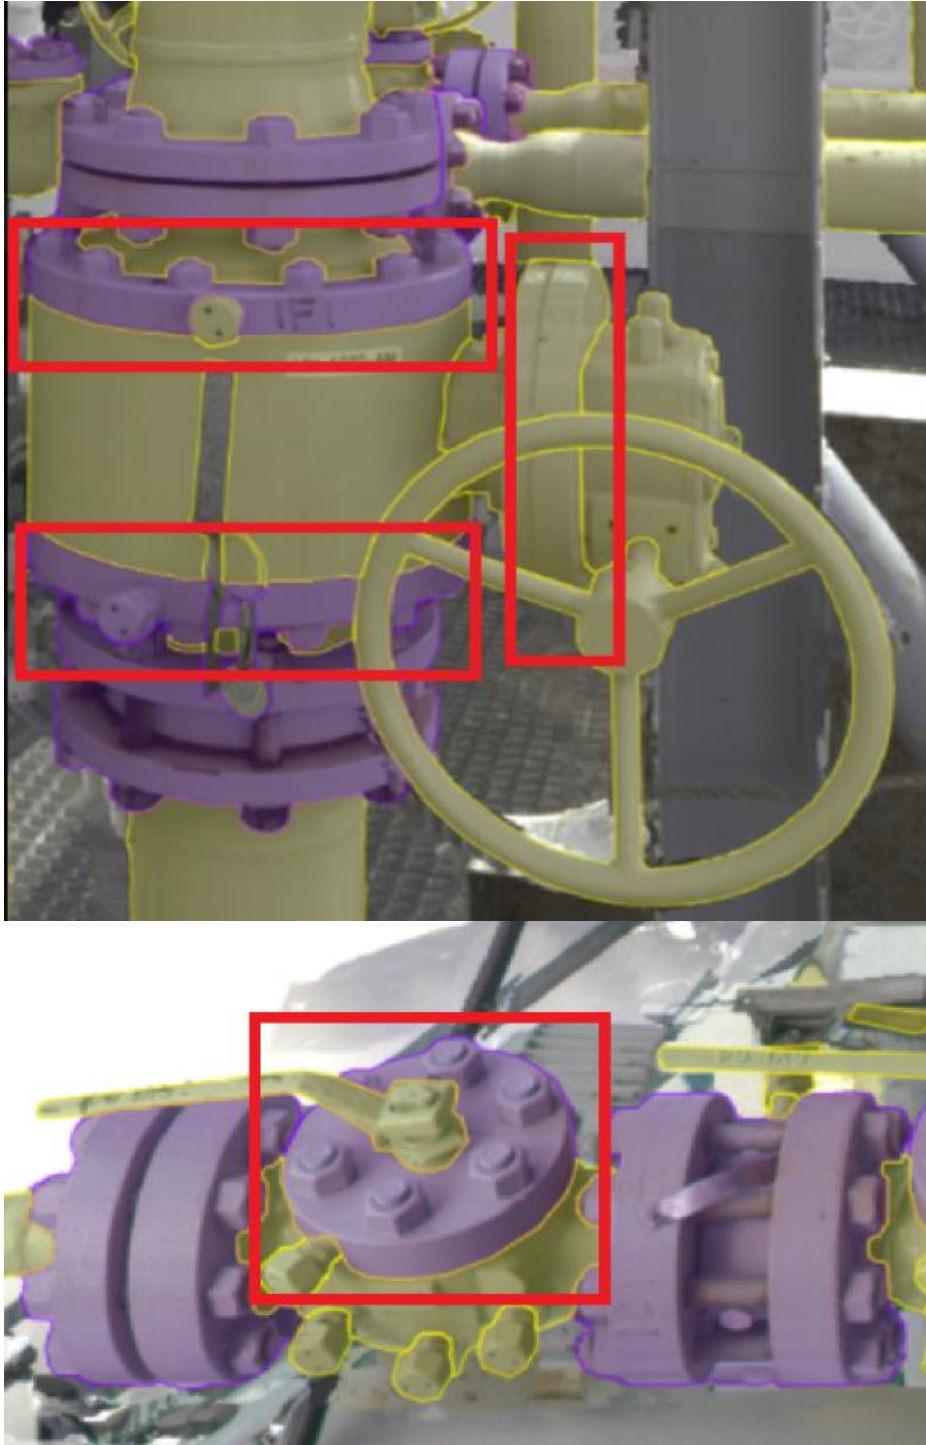

The highlighted part (red box) of the solenoid valve should be labelled as a **line**, because it is an integral part of the solenoid valve assembly.

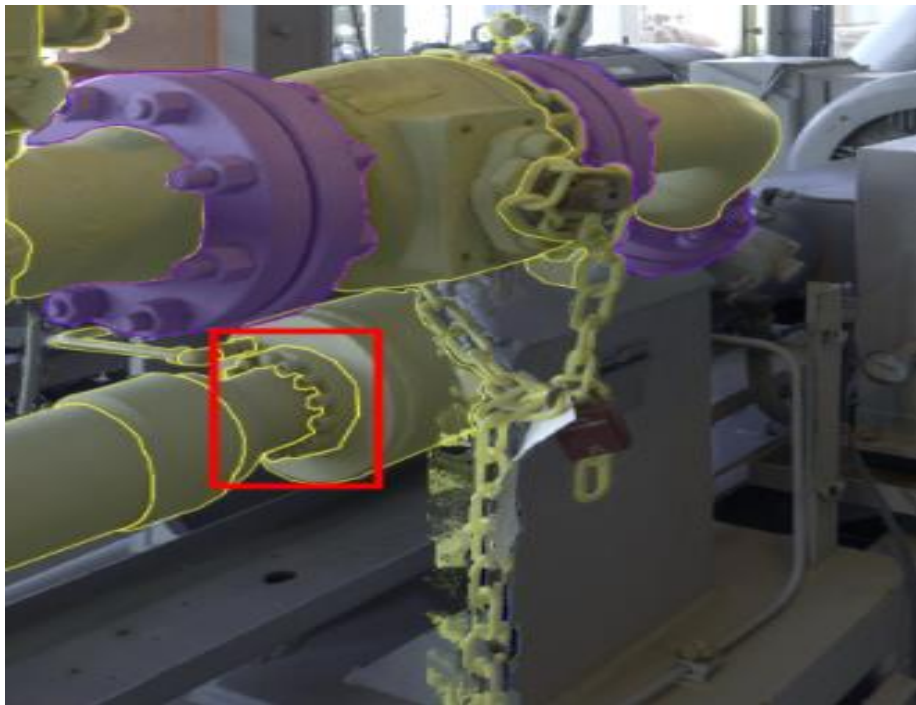

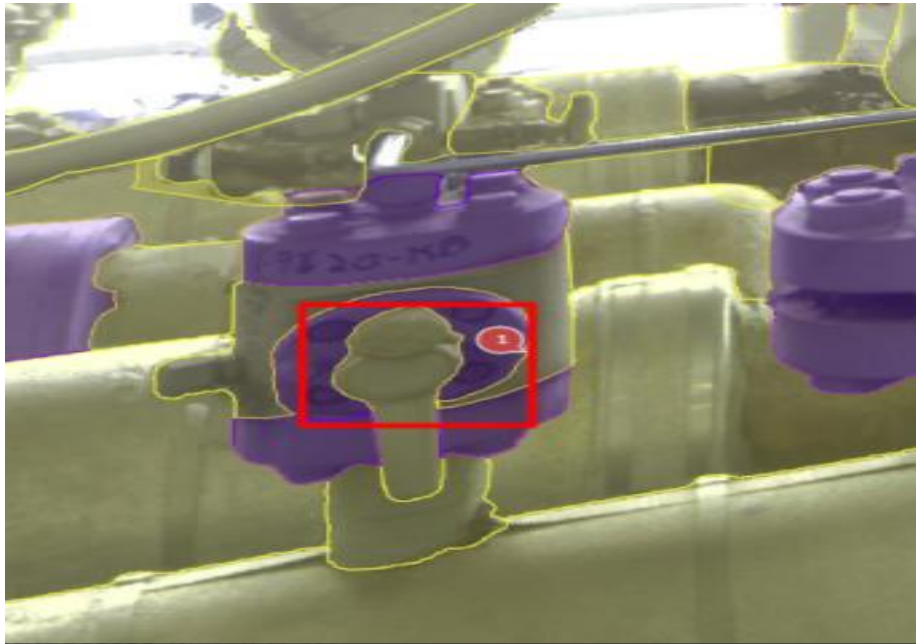

C

## 2- Ball Valve:

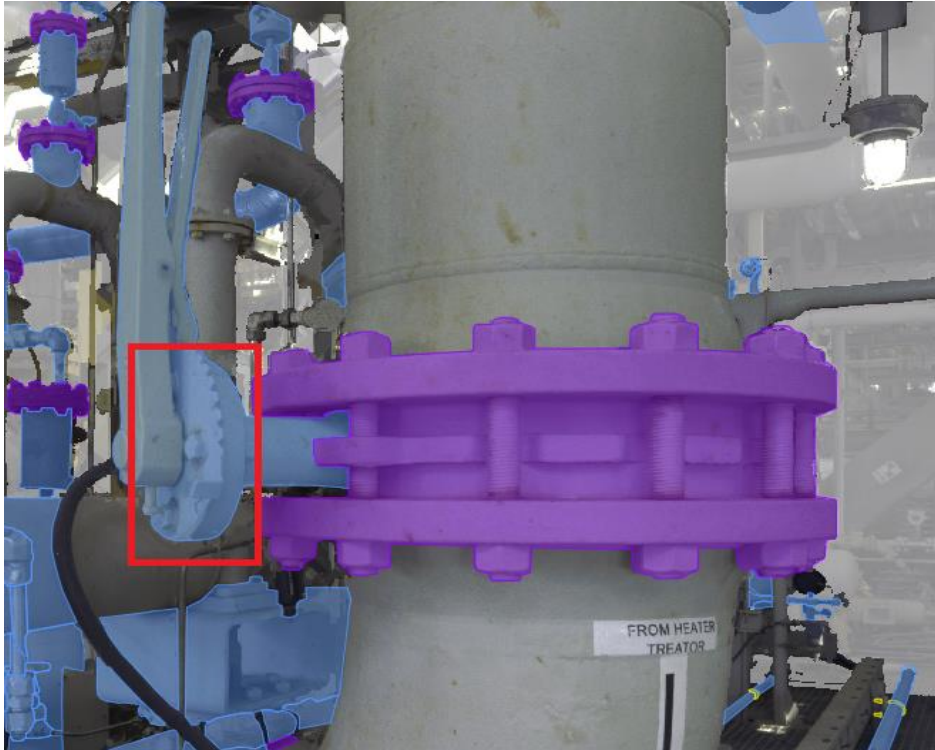

The highlighted part (red boxes) of the ball valve should be labelled as a **line**, because it is an integral part of ball valve assembly.

### 3- Butterfly Valve:

The highlighted part (red box) should be labelled as a **line**, because it is an integral part of Butterfly Valve assembly.

### 4-Pressure Safety Valve (PSV):

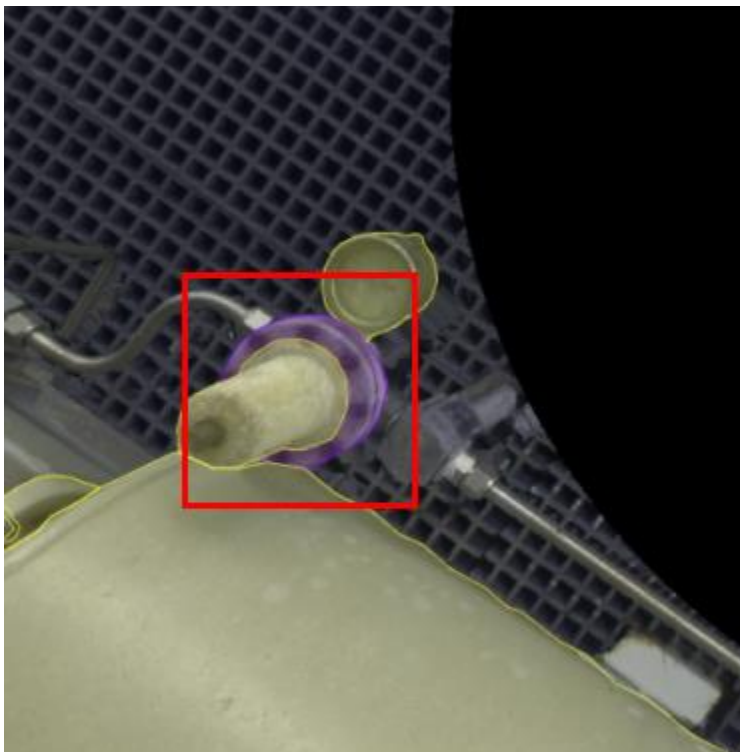

The highlighted part (red box) should be labelled as a **line**, because it is an integral part of PSV assembly.

#### 5-Pressure Control Valve (PCV):

The highlighted part (red box) of PCV should be labelled as a **line**, because it is a part of PCV assembly.

### 6-Pulsation dampener:

The highlighted part (red box) should be labelled as a **line**, because it is a part of Pulsation Dampener assembly.
